 Chandigarh

Skills

Programming: JavaScript (ES6+), C++, Java (OOP), Python, C#

Frontend: React.js, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, API

Database: MongoDB, MSSQL Server, Mongoose ORM

Software Tools: Git, GitHub, Postman, NPM, VS Code

Technical Concepts: DSA, REST API, Authentication/Authorization (JWT), Debugging

Education

Master Degree (MCA) from Punjabi University, Patiala with **8.77 CGP (2022-2024)**

Bachelor Degree Bachelor of Computer Science from DM College, Moga with **74.9% (2019-2022)**

HSE from GSS school, Bagha purana with **60% (2018)**

SSC from BRC school, Samadh Bhai with **84% (2016)**

Technical Skills Demonstrated

Hands-on experience in **Visual Studio**, **Git**, and **Postman**.

Debugged and tested applications using **breakpoints**, **watch window**, and **unit tests**.

Experience in **deploying** applications on **IIS** or local server.

Followed **MVC architecture** for scalable and maintainable code structure.

Achievements

Active member of Management and Extra Activities in university Department. Active Member of Welfare Committee in Hostel.

Class Representative of Master of Computer Application.

Placement Representative of Master of Computer Application.

Profile

Seeking for a broad development experience and technical expertise in a challenging role as a Full stack developer.

Projects-Based Experience

❖ MERN Stack

➤ E-Commerce Web Application (MERN Stack)

React, Node.js, Express, MongoDB, JWT

- Built a full-stack e-commerce app with user authentication, product listing, cart, and order management.
- Implemented secure login/signup using JWT and bcrypt.
- Created REST APIs for products, users, and cart operations.
- Integrated product filtering, sorting, and search functionality.

➤ Social Media Application (MERN Stack)

React, Node.js, MongoDB

- Developed user profiles, posts, likes, and comments features.
- Implemented authentication and protected routes.
- Designed scalable API endpoints with Express.

❖ Dot Net (Entity Framework)

➤ Real Estate Management System

ASP.NET MVC, C#, Entity Framework, SQL Server, LINQ

- Developed a scalable **real estate web application** to manage property listings, users, and transactions
- Designed **responsive UI** with Razor, Bootstrap, and modern frontend practices
- Optimized data retrieval and filtering using **LINQ queries**
- Integrated **authentication and role-based authorization** using ASP.NET Identity
- Applied **client-side and server-side validation** using jQuery and Data Annotations

➤ Dispatch & Trucking Management System

ASP.NET MVC, C#, Entity Framework, SQL Server, LINQ

- Engineered a **logistics platform** for dispatch, route optimization, and shipment tracking
- Implemented **asynchronous updates (AJAX)**, reducing page reload latency
- Designed backend logic for **efficient load assignment and scheduling**
- Built real-time dashboards for tracking operations
- Improved system performance with optimized queries and indexing

➤ Immigration Management System

ASP.NET MVC, C#, Entity Framework, SQL Server

- Built a **case management system** for handling large-scale applicant data and workflows
- Designed **normalized relational database schemas** ensuring data consistency
- Implemented **search/filtering features** for efficient data retrieval
- Developed secure modules for **document tracking and status management**
- Ensured **data validation and integrity** across application layers
